Paul,

I don't have access to any program other than what's available through Microsoft office. So, I simply need a PDF map that highlights the locations of the former lagoons. I am glad you made it clear to Pat where he should avoid work. Once I can view the map, I would like to have a quick call with you just to make sure we are on the same page regarding what you told him, and I'll follow up with a letter to him.

Jim

Jim,

The shape files are for ArcView. If you just want a map we can print out a PDF map with the staked locations. I believe we made it clear to Pat to avoid work in the former lagoons and that is why we physically marked the locations. I can work with Drew to put something together if you need us to.

Paul,

I know you are busy with a lot of stuff, but I wanted to follow up regarding the King Mill. I couldn't open the shape file. I think you and Drew went out and staked the lagoons, is that correct? Did you tell the owner not to disturb those areas? I need to send the Metal Recycler a letter before the end of Sept and I just wanted to see where we were with this.

Thanks
Jim

FYI, this is information that Drew compiled from our site visit last week. The excel file is related to the survey points we collected on site, and the shape file is for the polygons from the aerial review.

Thanks Drew.

Attached are the king mill figures, first one with our points/labels/structures, then rest of those are historical photos and the report figures you sent. I also attached the excel file with our data, and a GIS package that includes the structure polygons, BBL database points, and our survey points. If you want, I can send some aeriels, georef'd images but those are big. Would need to send those on CD or FTP site.
